SIXTY-SECOND YEAR, VOL. 62, NO. 77

IMPORANT MINORITY GROUPS

NEW DELHI, April 1.—(CP)—Two of the most important minority groups rejected the British proposals for post-war Dominion status for India today, the extremist Hindu organization Mahasabha joining the Sikhs in registering a negative response.

The working committee of the Mahasabha announced today that the proposals were not acceptable a few hours after a Sikh all-party committee had turned thumbs down.

The Sikhs, a Hindu war caste, rejected the plan as nullified by British special envoys. Staffed by the group that it would leave them in the care of the Muslim majority in the province.

As a result the Sikhs are expected to make common cause with the Muslims with the Mahasabha, whose rejection of the offer already had appeared certain.

The chief stumbling block to acceptance was the requirement that the Mahasabha members be left in British hands.

Final decision of all the major Indian groups are due before Friday. The Congress party, however, was drafting its reply but it was not known whether it would be handed to Mr. Jinnah.

The Muslim League also turned executive sessions today, when it is due to announce its verdict.

A late-minute glimmer of hope was seen, however, in a joint statement of Sir Tej Bahadur Sapru and Dr. Mukund Ramjee Jajayee, spokesmen of India's non-violent leaders. The statement said "It would be a tragedy if the Congress mission failed, for it would produce Continued on Page 2, Col. 8

Today's War Moves

By LOUIS F. KEENE
Copyright, 1942, by the British United Press and The Edmonton Bulletin

Indications are that the turning point of the war may have been reached. This is the Battle of Russia. In the opinion of London military observers, Hitler is prepared to stake everything in an all-out attempt to reach the Caucasus oil fields.

A Russian fails to collapse, his prospects for next year are precarious. The two factors that would then lead him to a Russian man power and Allied supplies. The two are interdependent. While Russia can raise troops as many men as Hitler can, they are effective only if properly equipped.

That is why Hitler has been so far from the Allied front line in the Caucasus and the Crimea. If he Continued on Page 2, Col. 8

Nazis Plan Great Smash Against Russia

DIRECTOR ANNOUNCES:

Selective Service Program Will Be In Operation Within Next Few Days

OTTAWA, April 1.—(CP)—

The government's new selective service program will be in actual operation in the next few days with unemployment insurance officials acting as temporary selective service officers, Elliott M. Little, director of national planning department, in his branch to assemble details of manpower requirements.

He said it might be necessary to move the "people to the work or the work to the people" but that advance of actual requirements is

THE WAR At A Glance

Burma-Chinese abandon Zungko, fighting out to main Allied lines; Anglo-Indian forces establish positions before American-Filipino forces have control of the air.

Southwest Pacific—U.S. Australian bombers continue to attack on Batavia and capture some positions before American-Filipino forces have control of the air.

Russia—13,000 trainloads of German troops reported to have moved up to eastern front for Hitler's spring offensive, but stopping of Russia's own offensive remains a big problem for the Germans.

Contributory Plan Pensions Is Urged

REGINA, April 1.—(BUP)—Saskatchewan's minister in charge of old age pensions suggests that the federal government should consider a contributory pension scheme for the Canadian.

He says the present old age pension scheme is rapidly reaching the point where more are getting out of hand and a revision of the system is becoming more and more necessary.

The provincial minister, A. P. Proctor, made his suggestion in speaking to a motion of the opposition for a five-dollar per month increase in pensions.

Ship Torpedoed

WASHINGTON, April 1.—(CP)—The United States Navy announced today that a medium sized Panamanian merchant vessel had been torpedoed off the Atlantic coast.

Nothing To Report

CAIRO, April 1.—(AP)—British army headquarters said in its daily bulletin that since Sunday there has been "nothing to report" on the Libyan battle situation.

Less Bread

LONDON, April 1.—(CP)—The House today reported Tuesday night that after a three-hour debate, a reduction in bread rations was announced.

A spokesman said that Britain had received from the United States a large quantity of British and American supplies in expectation of German attacks.

Informants said that with the lengthening days of spring and the Continued on Page 2, Col. 3

FIERCE BATTLE

Chinese Escape Jap Trap By Withdrawal At Tougoo

Machinery Set Up For All-Out War In Pacific

By DAVID M. NICHOL
Copyright, 1942, by the Chicago Daily News and The Edmonton Bulletin

WASHINGTON, April 1.—The machinery has now been provided for all-out war in the Pacific.

It remains only to determine how it will work.

On paper, the creation of the War Council by President Roosevelt raised the dominions "down under" and China, to equal partnership in the political discussions of a council assembly.

Like the President's recently disclosed order to the red tape of the United Nations as effective as they potentially can be. Australia and New Zealand have been point-blank hit, and scattered in the woody hills to make contact with a Chinese relief army.

Five thousand Japanese were reported killed in the five-day stage of the Java Chinese battle, but not disclosed, but many killed by the death in shadow.

Free French Navy Admiral Resigns

MONTREAL, April 1.—(CP)—Vice-Admiral Emile Muselier, Free French naval commander, has resigned from the French national command in London, according to a cable received in Free French headquarters here today.

The cable was signed by General Charles de Gaulle, leader of the Free French movement. The cable was sent to Washington and telegraphed to Montreal.

The cable said that Admiral Muselier had resigned from the committee at his own request and had been replaced by Admiral de Gaulle. The cable did not say where Admiral Muselier was at present or what his future plans were.

By The Canadian Press
Hard-fighting Chinese defenders of Burma were reported to have escaped a Japanese trap at Tougoo today, falling back to the north after the fiercest battle of the whole Burma campaign so far.

Tougoo, 185 miles from Rangoon, was the eastern base of the Allied line in central Burma.

In the Philippines, a war department bulletin reported, Japanese troops heavily attacked the right wing of Lt. Gen. Jonathan Wainwright's line.

Wainwright's line of Bataan peninsula had been captured some 100 miles from the main Japanese base in Luzon.

U.S. Expects Labor Shortage Within Next Few Months

Expanding Production Will Absorb 20,000,000 Workers By End Of Year

WASHINGTON, April 1.—(CP)—The United States will face a labor shortage within a few months, says Harold D. Smith, director of the budget bureau. His statement was taken as further evidence that the United States must adopt a general policy of manpower mobilization along the same general lines as the Canadian government announced a few days ago.

Chinese Force Escapes Nippon Tongoo Trap

Continued from Page One
machine-gun and rifle pits under increased fire-bombing attacks and enemy artillery fire.

On the British-held western flank, the situation was equally grave. British headquarters reported that Japanese forces were holding Shweidung, 10 miles south of Burma, on the road to the West Burma oil fields after a fierce battle with British and Indian battalions.

GAIN AIR CONTROL

A communique further conceded that the Japanese had gained complete control of the air and that British planes along the frontward river had been forced to withdraw to protect their right flank against enemy infiltration.

Australian and United States airmen, battling at Japan's invasion front in the islands where Australia, struck again today at Salama, New Guinea, scoring hits on a Japanese transport.

Australian observers reflected a mounting optimism that the Japanese could be held off in New Guinea as a result of increasing Allied superiority in the air, heavy blows to enemy shipping and the arrival of the three-month rainy season.

nay, every civilized human being—

SOMETHING TO REMEMBER

and their inhuman captors chasing at the point of the bayonet, those who would bring them relief.

Recall that Canadian soldiers were flogged and then shot by these pagans who smiled and proclaimed that all they wanted was peace.

Ponder over the fact that at Hong Kong women were violated by the

F. J. Fitzpatrick, who has been appointed provincial director of credit unions. He transfers his activities from the public works to

soldiers of the Rising Sun, while Lt.-Gen. Yamashita, a general trained with Hitler's hordes in Germany, the trade and industry department. He is president of the Edmonton Branch

connived and approved.

Then consider the German atrocities in Poland, Russia and elsewhere—mass murders of civilians,

GOERING PAID HIGH FOR HIS LESSON

Premature Start On Second Front Would Be Suicide

United Nations Must Have Absolute Control Of Air Says Expert

By MAJOR ALEXANDER P. DE SEVERSKY
British United Press Aviation Analyst.

NEW YORK, April 1.—(BUP)—Pressure for opening a "second front" in western Europe has been increasing from many directions. Political speeches on the subject have been echoed in editorial comment and by amateur strategists. The alarming part of this propaganda is that its accent has been on the "need" for such an invasion of Europe, rather than upon the practical military possibilities.

Everybody realizes that "defence cannot win the war," and in the abstract there can be no quarrel with the necessity for bold offensive action. But the surest road to a disastrous defeat is an offensive that is ill-conceived, ill-equipped and ill-timed.

Whether Norway or the west coast of Europe or Italy should be invaded is not a political but a military question. In the measure that individual writers or political representatives turn it into a political issue they may be forcing the hand of the United Nations to undertake costly and premature adventures.

VITAL FACTORS

We know that to secure a decision in a large offensive action requires the right force at the right place at the right time. If any of these three essentials is faulty, the whole venture is usually doomed. That applies to offensives on land, on the sea and in the air—to a combination of all military forces.

The world witnessed defeat of the German Luftwaffe in the Battle of Britain. That attack was made with wrong types of air equipment, and directed against the wrong targets. There is room to doubt whether those who clamor for a "second front at any cost" have taken to heart Goering's experience in that battle in the English skies.

They should understand that Germany could not even begin to invade the British Isles until the German air force had mastered the skies. The Germans could not gain ingridence on the British side of the channel because the R.A.F. could concentrate its whole strength and demolish them.

As long as British aviation held the upper hand, the Nazis could not

ever since 1933, while ours are only getting under way. We cannot as yet master the right kind of force and must improve, we cannot as yet master a solid roof of air power under which that force can operate.

The two elementary aviation facts are these:

1.—That we should not attempt a large-scale invasion until we are prepared to take command of the air overhead;

2.—When we do have that aerial supremacy, it will probably be more practical to attack Western Europe rather than Italy, since the British Isles offer a more useful primary base of operations.

MAY END QUICKLY

Even when we have superior air power to our disposal it may not be wise to undertake invasion until the enemy's resistance has been reduced by systematic bombardment of his vital industrial and military centres. After that, it may well be an army of occupation rather than an army of invasion that will suffice to finish the job.

But we do not as yet command air power. No amount of speechifying about the need for offensive action, and the importance of additional fronts, can make up for the lack.

The fact is that the United Nations already have too many fronts and are scattering, instead of concentrating their effort.

The Nazi type of blithering has impressed certain experts so much that they fail to recognize that strategy has rigid limitations that it cannot work when the enemy is located across a body of water and has the protection of adequate air power.

It is preposterous to consider invasion of the Italian peninsula until we obtain unquestioned control of the skies over the Mediterranean. Lacking that prerequisite, large-scale expeditions would merely present the enemy with convenient targets for Axis air power.

F.D.R. Upheld

WASHINGTON, April 1.—(AP)—The United States senate rejected on a voice vote Tuesday amendments to pending legislation which would have suspended the 40-hour week, outlawed the closed shop and made it unlawful to use threats or violence to keep workers from their jobs.

Mr. Cowan said from 1932 to June 30, 1937, the city saved \$824,806 by reducing salaries and wages and from June 30, 1937, to the present an amount equal to 8.1 per cent of the payroll.

Calgary Civic Workers Ask Big Increase

ANNOUNCEMENT OF THE BOARD OF Arbitration's findings on the wage dispute between the city and the Calgary Federation of Civic Employees will be made shortly, Dr. W. E. Spence, chief man, said Tuesday at the concluding session of the hearing.

In marked contrast to previous hearings which went on for weeks, the first sitting was held Monday morning and the second and final one Tuesday afternoon. Findings will be released through Hon. E. C. Manning, under whose authority the board was set up.

Tuesday afternoon rebuttals on the original statements were presented by Mayor Andrew Davison and W. A. Cowan, president of the Federation.

The Federation's request for a straight 20 per cent increase would raise the city's wage bill \$322,250 annually, Mayor Davison said. This, with the school board's increase of \$40,150, would bring the total up to \$362,400, or about 6.42 mills. He pointed out it would increase the tax rate by that amount.

If the city's offer of a seven per cent increase went through there might be some increase in the mill rate he said, although the commissioners would endeavor to keep the levy down to the 1941 rate of 4.41 mills.

Mr. Cowan said from 1932 to June 30, 1937, the city saved \$824,806 by reducing salaries and wages and from June 30, 1937, to the present an amount equal to 8.1 per cent of the payroll.

the burden justly belonged and not on the shoulders of a group of civic employees who were possibly 50 per cent taxpayers.

Tin To Come Out Of Canadian Penny

OTTAWA, April 1.—(CP)—War-time scarcity of tin has hit the Canadian one-cent piece but without reducing its value.

The cent is made out of copper, zinc and tin in certain proportions. Now the formula is being changed at the royal mint to cut down—

not cut out—the use of tin. No change in the Canadian five cent piece is contemplated. There is plenty of nickel to last out the year.

Two new members, Group Capt. H. P. Crabb, Royal Canadian Air Force, Ottawa, and D. A. Ross, Calgary, were elected to the national board.

Group Capt. Crabb said the training of air cadets was a means of filling the R.C.A.F.'s need for men with the necessary qualifications. He advised against the training of boys who would not be able to take their place in the air force as it would be costly procedure and disappointment to both boys and the civilian supporters of the league.

The league board agreed the air cadet syllabus of training should be modified slightly to tie-in with the initial training school course of the R.C.A.F. This work is expected to average four hours a week for two 10-month terms with most cadet squadrons.

It was decided the league should concentrate mainly on enrolling boys of 15 to 18 years and only take boys under 15 as juniors in special cases.
